

COAT CARE

Revitalising shampoo

EQUI WASH

IMPROVED
FORMULA

Cavalor® Equi Wash is the ideal shampoo to give your horse a delightful shower. The pH neutral formula removes dirt while being gentle to the skin.

Enriched formula for the best results

Cavalor® Equi Wash is infused with **Provitamin B5 and glycerin**. Provitamin B5 penetrates the hair shaft and helps to improve the moisture content of the coat. Hair that is hydrated appears thicker and more elastic, making it less susceptible to breakage. The glycerin will act as a real coat conditioner giving strength, volume and natural shine to the hair. Cavalor® Equi Wash is easy to wash out and will give your horse's coat a healthy glow.

“What's good for us, will be good for our horses ??”

Contrary to human skin, which has a natural pH of 4,0 - 5,5, the equine skin has an optimal pH of 7,0 - 7,4. Figure 1 shows that when using products that have a low pH, such as human shampoos, it will attract the moisture in the skin and result in a dry, flaky skin. Bleaching products have a high pH, they will strip away the natural oils of the skin and make it susceptible to infections.

Cavalor® Equi Wash is formulated especially for horses. Thanks to the **neutral pH**, the shampoo is gentle to the skin and makes sure that the skin stays hydrated.

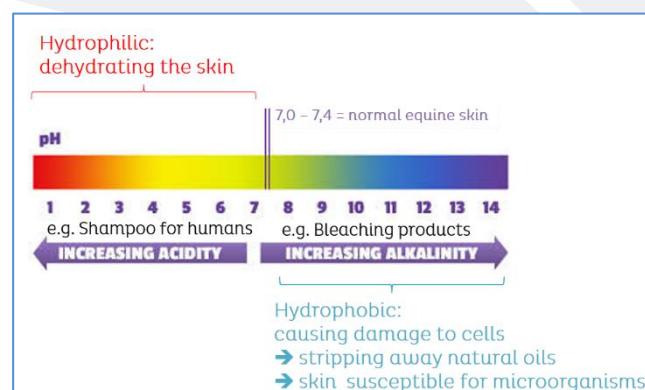

Figure 1: the importance of the right pH in equine coat care products

PRODUCT FOR EXTERNAL HORSE CARE

Description

Rose petal pink shampoo

Directions of use

Wet the horse's coat to remove any loose hair or dirt.
Apply Cavalor® Equi Wash directly on the coat, or dilute a small amount in lukewarm water and apply with a sponge for a fresh, clean coat.
Rinse the horse's coat thoroughly.

Caution: for external use only

Packaging & storage

500 ml / 16.9 fl. oz. bottle

2000 ml / 67.6 fl. oz. spoutbag
